**Promoting reuse and recycling in Nebraska**

## **A Tree in the Forest**

*WE'VE MOVED* our offices here at Keep Nebraska Beautiful. Fortunately it was only from the 3rd floor to the 1st of the same building, so exposure to the bitter winter temps was kept to a minimum! Please note that our address is still 3201 Pioneers Blvd., but that our suite number is now 118. All other information – phone numbers and email addresses etc. – remains the same. Thanks!

Each year wood-based products are among the most reused and recycled materials in Nebraska. Though only a tree in the proverbial forest, in 2006 Materials Exchange Program participant listings matched nearly 5.25 million pounds of wood waste – sawdust, cutoffs and the like. Throw in paper, cardboard, and pallets, and the total more than doubles to some 13.9 million pounds, or over 82% of the total weight diverted through the Exchange for the year.

Totals for 2007 show that these same products account for more weight diverted (over 11,000 tons) than all materials in any year since the Materials Exchange began! Since its inception, the Materials Exchange has proudly facilitated the landfill diversion of some 41 thousand tons of wood, and wood-based materials.

Manufacturers and processors across Nebraska reuse at least a portion of their wood waste, or exchange it with someone who can. Recycling programs, both public and private also accumulate wood based products in many regions. Several are Exchange participants who cover as much of the territory around their facilities as time and expenses allow. Unfortunately certain areas throughout the state remain underserved due to low yields of the material being sought. Many pallet recyclers for instance would be more than happy to expand their service region if they could collect enough pallets to make it cost effective. Although specific numbers are unavailable, one can surmise that a good number of usable pallets in these areas end up being landfilled.

At least two solutions seem plausible. The first would be to get generators in underserved areas to pool their pallets together until enough are amassed to make it worth a trip for recyclers. Even if they were only collected periodically, it would certainly be better than taking up landfill space. While that may mean that some pallets deteriorate to a point that they can no longer be reused, many recyclers have the means to convert the material into a form suitable for secondary applications - fuel pellets, bulking agents, mulch, animal bedding and the like.

Another solution might be to bring small quantity

generators and seekers together within an area in order to form ongoing exchanges. Even if a community is unable to generate enough product to make it worth a recyclers trip, surely a sufficient number of businesses and "duct tape and bailing wire" folks exist to divert a fair share of them. Of course that would mean adding another "tool" to their kit, but those with the imagination to fix anything with those two items, can surely find a use for 3' – 4' wooden planks! That said, the Materials Exchange is uniquely positioned to facilitate both of these solutions and will, in part, be focusing its marketing efforts in 2008 toward whatever works best for a given community. Of course our job is merely to put interested parties in contact with each other. The real work will be done by those with a vested interest in saving money and local landfill space.

The other side of our marketing efforts for the year will focus on industrial wood waste. An obvious industry with an unending stream of wood waste would be cabinetmakers, or woodworking shops. While financially imperative for large-scale makers, smaller shops often aren't aware that recycling wood waste can be advantageous for them as well, even if it does require waste separation. In most places an extra bin wouldn't interfere with operations, and reducing their landfill impact would mean money saved. In February, the Exchange sent flyers out to 300 shops across the state, and have heard back from several. While not yet enough to make a huge dent, we are excited by the prospects.

The most underserved industry may be the construction and demolition sector – an area that sees little reuse or recycling period. It's estimated that construction of the average 2000 square foot house generates some 5 tons of waste, and wood accounts for more than 27% of that. Demolition of the same house generates almost 78 tons of waste, nearly all of which ends up in the landfill. The biggest reuse/recycling obstacle seems to be the need to separate on-site the usable waste from that destined for the landfill. While recycling these materials would be prudent practice today, until tipping fees and transportation costs rise enough to make the benefits inescapable, the landfilling of C & D waste isn't likely to change. While not an area where we expect to see much movement in the coming year, it's important that people are aware of just how much C&D waste there is. That said, talk of \$4/gal gas this spring may mean that the time is finally upon us. Wood recyclers in Lincoln and Omaha especially would love to increase their yield without having to leave the city limits.

**A Monitor Situation**

When an office in Lincoln called to say that they had 30 monitors for sale cheap, we let them know that the odds for success weren't good. After all, the National Council of Safety estimates some 500 million sit on warehouse shelves in the U.S. as businesses postpone eventual recycling costs. Our doubts eased a bit after learning that they had 21-inch screens, but we still expressed reservations. Much to our surprise, mere hours after sending a group email to area participants seeking computer equipment, a school west of Lincoln called to express strong interest. They took 27, which left us pondering how few of those warehoused across the country actually have a decent sized screen.

**Brick by Brick**

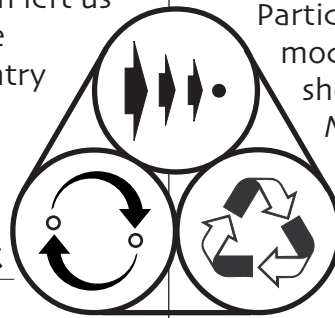

A participant in southeast Nebraska contacted us recently to say that their long abandoned village bank was slated for demolition, and wanted to know if we had any participants seeking brick. There was also a good deal of iron in the form of the old vault walls, and threshold. We contacted area seekers of construction material, and to date have received replies from several interested parties. Three for sure have made the trip to town carrying off the vault walls and a couple tons of brick. Any plans for a return trip have probably been put off until spring at this point. Having said that, as new to-do lists are compiled through the long winter months, one can imagine the space cleared by summer even if it's hauled away brick by brick.

**Interested Participants Clean Up**

A Lincoln participant recently decided to change the soap dispensers in their bathrooms. Not that there was anything wrong with the old ones, but the new model is more conducive to the high volume traffic their facilities see every day. While no participants are specifically seeking such an item, we sent an email to several we thought might be interested. To date, we have received a couple of responses and some 30 dispensers have been picked up. While happy to make the matches, it's just a few suds in the tub as far as this listing is concerned. Whatever the need, there are plenty of dispensers to go around.

Participants interested in the model specs on the internet should look for the Gojo NXT Maximum Capacity #235-08. Each unit holds a 2000 ml bag in box. Soap is not included.

**SUCCESS STORIES**

**Rubber Match Declared**

Several months ago, a manufacturer with facilities in NE Nebraska contacted the Exchange looking for reuse/recycle options for more than 75 tons of rubber waste they generate each month. We were able to match the production waste portion with an in-state recycler right away, but the post-production stream remained a problem. After negotiating with several out-of-state reusers, 2 in North Carolina came together in an effort that made transportation costs feasible for all parties. To date, more than 484 tons of rubber waste have been diverted from Nebraska landfills and relationships have been developed that we hope remain in place for years to come.

# Nebraska Materials Exchange

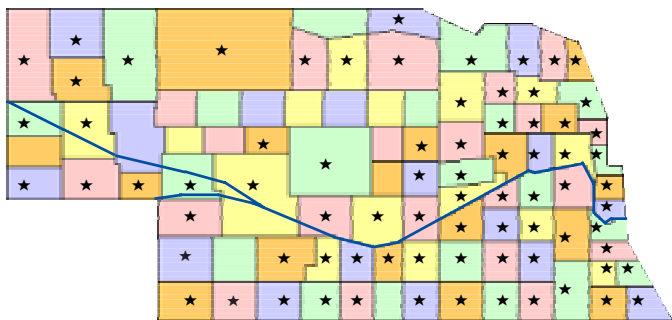

The purpose of this form is to identify any waste or surplus materials from one business, industry or school that could be utilized by another. The more information you provide, the more likely an exchange will occur.

**Company/Organization**

<b>Contact</b>	<b>Date</b>	
<b>Mailing Address</b>		
<b>City</b>	<b>State</b>	<b>ZIP+4</b>
<b>Phone (     )     )</b>	<b>Fax (     )     )</b>	

**Note: Please complete all applicable items. If you have more than one item, please copy this form for each material, or attach a list of materials and the quantity of each one.**

1. Is your company/organization a 501(c) 3 nonprofit organization?  Yes  No
2. May we release your name/address/phone to interested parties?  Yes  No
3. Are you SEEKING or GENERATING this material?  Seeking  Generating
4. **Please Specify Material Here:** \*Generic name or primary usable constituent (if plastic, list mfg. & commercial name/grade #):  
 \_\_\_\_\_  
 \_\_\_\_\_
5. **List quantity** (in units: pounds, etc.): \_\_\_\_\_ **Per:** Day Week Month Quarter Year 1X only
6. **Physical state:** (if applicable) Liquid Slurry Solid Semi-solid Sludge Dust Cake Gas Other \_\_\_\_\_
7. **Packaging:** (circle one) Bulk Drums Dumpsters Gaylords Pallets Bales Other \_\_\_\_\_
8. **General information as known:** chemical composition, type of plastic, main ingredients, cost, pH, toxicity, reactivity, color, particle size, flash point, total solids, purchase date, industrial process generating this material, contaminants, etc.  
 \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_
9. **Available to interested parties:** (if applicable)  Sample  Lab Analysis  Independent Analysis
10. **Please list any items your company would be willing to donate to schools or nonprofit organizations.**  
 (Working computers, office furniture and equipment, cleaning supplies, etc.)  
 \_\_\_\_\_  
 \_\_\_\_\_

Thank you for your interest in the Nebraska Materials Exchange Program (MEP). We'll send a copy of our quarterly newsletter, **The Link**, & keep in contact regarding your listing. If a MEP referral results in a match, we'd appreciate the information.

**Please mail or fax this form to:**

Keep Nebraska Beautiful,  
 3201 Pioneers Blvd., Suite 118, Lincoln, NE 68502-5963  
 Fax: (402) 486-4563
